2. Introduction

In some cases Faurecia issues Self-Billed Invoice to the Supplier, to settle the deliveries booked at Faurecia during a period of time. It is a credit or debit note based on the quantities received booked at Faurecia and on the valid prices maintained at Faurecia.

For an electronically transmitted invoice authenticity of origin and integrity of data has to be ensured. In case of usage of EDI according to article 2 of the EC recommendation 94/820 EC as of 19th October 1994, authenticity and integrity are assumed to be maintained, if the agreement on invoice data exchange contains specifications about suitable means and procedures.

Consequently, pre-conditions for using EDI are:

- The existence of an agreement to use EDI between the involved partners;
- Reliable, documented and auditable internal processes, which ensure the generation of correct messages by the used electronic data processing (EDP) systems, respectively which ensure a correct processing of received invoice data. The used processes and procedures must ensure as well that unauthorised persons cannot, neither deliberately nor accidentally, change the data.
- The application of a means of transmission, which ensures authenticity and integrity of the data;
- A data exchange format, which is able to transmit all necessary data with respect to commercial and taxation legislation and to the business requirements.

The EDIFACT format is recommended, because it is an accepted electronic invoicing format in all countries of the European Union and it contains all mandatory and optional fields for the various invoicing scenarios.

Currently the following EDI Standard is supported: UN/EDIFACT INVOIC D.07A according to VDA Recommendation 4938 Part 2.

2.1 Message definition

Functional description

The Self-Billed Invoice transmitted electronically aims to meet all tax and legal requirements, without the need of additional document in paper form.

Field of application

The present guideline applies to Faurecia entities using the Faurecia Core System (FCS).

The described format supports explicitly the following business processes:

- Debit notes issued by the customer, which relate to invoices sent by the supplier (in the sense of corrections)
- Credit notes of the supplier, which relate to previous invoices sent by the supplier;
- Self-billed invoices (from customer to supplier)
- Debit notes or credit notes, issued by the customer and sent to the supplier, which relate to self-billed invoices previously sent by the customer;
- Debit notes and credit notes due to price corrections;
- Invoices for materials from consignment stock
- Credit note for collection process

Frequency, granularity

Frequency: the way the Faurecia entity generates the Self-Billed Invoice depend on the business process and on the specific constraints of this entity. Typical schedule is 1 generation operation per week + 1 additional generation by end of the month.

Granularity: when the Supplier makes direct deliveries to Faurecia, the reference is the delivery note number assigned by the Supplier. When the consumptions are done from a consignment stock, the reference is the internal booking number generated at Faurecia, this booking number concerns only 1 material and within one date, for 1 material, several booking numbers may be created at Faurecia. Depending on the constraints in payment terms, the Faurecia entity may group the references, e.g. one Self-Billed Invoice number per day of delivery, or no, e.g. one Self-Billed Invoice number per booking number.

3. Message structure referenced at Faurecia

3.1. Segments table

In the table hereunder are included only the segments and segment groups used by Faurecia. An EDIFACT interchange file contains an interchange frame (UNB-UNZ) with one or more messages (UNH-UNT). The interchange frame can be preceded by a service string advice to define the used separator characters (recommended).

One interchange file contains only messages of the same type, INVOIC here.

Segment: **BGM** Pos.: 3 Level: 0
Status: M Max. occ.: 1

Function: **Identification of a Invoice**

Usage notes: This segment is a unique identification of the invoice document, by means of its number. For
BGM 1001, the values elected by Faurecia are: 389 =
Self-Billed Invoice 393 =
Consignment Invoice Self-billed 402 =
Credit Note issued by the Buyer, Self-billed Invoice 403 =
Debit Note issued by the Buyer, Self-billed Invoice 295 = Price
variation invoice

Faurecia may provide in BGM 1000 a clear text; possible values are (not exhaustive): SELF-
BILLED INVOICE CONSIGNMENT
INVOICE SELF-BILLED CREDIT NOTE
DEBIT NOTE PRICE VARIATION INVOICE

Group: **SG7** Status: M Max. occ.: 1

Segment: **CUX** Pos.: 22 Level: 1
Status: M Max. occ.: 1

Function: **Invoice and home or payment currency**

Usage notes:

This segment group is combining a (source) currency and, if needed, a target currency with the appropriate rate of exchange for those cases, where the transformation of currency is necessary. The segment is present even if the invoicing currency is the official domestic currency. It has to contain the invoice currency and may contain home or payment currency. Invoicing currency is always to be given in the first occurrence of the CUX segment, C504#1 as follows: 6347: '2', 6345: currency, 6343: '4'
If a different payment or home currency is to be given, the second occurrence of C504 in the CUX segment is to be used as follows: second 6347: '3', second 6345: currency, and second 6343: '3' or '11'.
Data element 5402 contains the currency conversion rate.

If three currencies have to be transmitted, another SG7 - CUX, DTM has to be created and the following rule shall apply:

	SG7#1 CUX
C504#1: invoice currency (see above)	SG7#1 CUX
C504#2: payment currency (see above)	SG7#2 CUX
C504#1: home currency (see below) 6347 '3' 6345 Currency 6343 '3' Home currency: in some countries it is a requirement that, for invoicing in foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to the CUX segments, authorities would require the invoicing currency and the home currency to be shown, together with the rate of exchange (element 5402).	

EDIFACT			FAURECIA Implementation

Status: M Max. occ.: 1

Function: **Payment type**

Usage notes: 2475, 2009, 2151, 2152 are used if 4279 = 22.
2475: Reference to the date of a specific event, e.g. issue date of a specified business document.
 Faurecia uses Date of Invoice. **2009:**
 Code relating terms to a reference date, time or period. Not used by Faurecia. It means that the
reference date is the date of invoice at all times. **2151:**
 Code identifying a period. Faurecia uses Day. **2152:**
 Actual number of periods (days, weeks etc.) belonging to a payment term.

Group: **SG26** Status: M Max. occ.: 900

Group: **SG34** Status: M Max. occ.: 1

Segment: **TAX** Pos.: 46 Level: 2
Status: M Max. occ.: 1

Function: **Line Item VAT or other tax rate**

Usage notes: Under EU directive and national law, any exemption from tax has to be declared more detailed. There are several provisions in the directive, which allow exemption. In the European environment it is necessary to state this reason whenever the invoice issuer declares an invoice item or the whole invoice to be VAT exempt. **5305:** Code specifying a duty or tax or fee category. This code list contains codes referencing to the Sixth EU directive regarding tax exemption and special procedures. It is intended to be harmonized with other European industry organizations and finally the codes shall be added to the UN/ EDIFACT code list 5305 to facilitate a homogeneous implementation of the directive's provisions throughout Europe. The use of any valid EDIFACT code is permitted; the trading partners may limit the codes in accordance with business and legal requirements. (1) Codes created to comply with the European invoicing directive. These codes are not yet part of the official EDIFACT code list. In Europe it is recommended or may be even required to use these more specific codes instead of code E. See table of possible codes specified by ODETTE in Annex A hereafter. **5305:** Code specifying a duty or tax or fee category. In some countries the UN/EDIFACT codes may be replaced with codes published by a local standardization authority, example in France, the GALIA association specifies a list of codes.

MOA+77:424.35:EUR'

Group: **SG50** Status: M Max. occ.: 2

Segment: **MOA** Pos.: 51 Level: 1
Status: M Max. occ.: 1

Function: **Total taxable amount**

Usage notes: This SG50 is present even if only zero rate taxes apply to the invoiced items.

When a non-zero tax rate applies, SG50 total taxable amount may have more than 1 occurrence. In some countries it is a requirement that, for invoicing in foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to the CUX segments, authorities would require the invoicing currency and the home currency to be shown, together with the rate of exchange (element 5402).

Usage notes: This SG50 is present even if only zero rate taxes apply to the invoiced items.

When a non-zero tax rate applies, SG50 total tax amount may have more than 1 occurrence. In some countries it is a requirement that, for invoicing in foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to the CUX segments, authorities would require the invoicing currency and the home currency to be shown, together with the rate of exchange (element 5402).

6. Annex A- Data element TAX 5305. List of codes advised by ODETTE.

Code	Description	Explanation	Application guideline
E	Exempt from tax	Exempt export of goods	To be used when invoicing goods which are exported from a country outside EC to a country

Faurecia specific: M=Mandatory, C=Conditional, O=Optional, N=Not used

			within EC.
S	Standard rate	Standard rate applicable in the respective country	To be used when invoicing goods or services where the standard rate of VAT is applicable
AAA	Article 146, 148 and 151 of Council Directive 2006/112/EC	Exemption of exports from the Community and like transactions and international transport.	To be used when invoicing goods which are delivered to a non-EC country and when invoicing certain services, where these are directly connected with the export of goods.
AAB	Exempt – Article 164 of Council Directive 2006/112/EC	Special exemptions linked to international goods traffic.	To be used when invoicing goods which are imported from a non EC country into an approved warehouse, or free zone, within the EC area, and held in warehouse under VAT suspension. This arrangement may also include VAT suspended goods movements between different approved warehouses within the EC provided that the goods are re-exported from the warehouse to a non-EC country. Should also be used for transport costs included in customs value. <u>Example:</u> a company in EC country A imports goods from US and stores them in an approved warehouse, under VAT suspension. The EC company A then sells the goods to a company in EC country B and transfer the goods from the warehouse in country A to a warehouse in country B, still under VAT suspension. Then the company in country B sells and delivers the goods to a company in Russia.
AAC	Exempt – Article 138 of Council Directive 2006/112/EC	Exempt Intra-Community supplies of goods.	To be used when invoicing goods which are delivered from one EC country to another EC country if the customer has a VAT number in another EC country. The goods have to be dispatched or transported by or on behalf of the vendor or the person acquiring the goods.
AAD	VAT exempt - Article 44 of Council Directive 2006/112/EC	VAT Exempt cross border supply of services to a customer in a non EC country	To be used when invoicing all taxable services except from work on real estate, passenger transport, cultural, educational, entertainment, scientific and similar services, restaurant and catering services and short time hiring of means of transport.
AAE	Reverse Charge - Article 44 of Council Directive 2006/112/EC	Reverse charge cross border supply of services to a customer in another EC country	To be used when invoicing all taxable services except from work on real estate, passenger transport, cultural, educational, entertainment, scientific and similar services, restaurant and catering services and short time hiring of means of transport.
AAF	Exempt – Article 346 of Council Directive 2006/112/EC	Exemption under the special scheme for investment gold.	To be used when invoicing investment gold to a customer in another EC country, where the special scheme for investment gold is applicable.
AAG	Exempt – Article 131, 132 and 135 of Council Directive 2006/112/EC	Exempt within the territory of the country.	To be used when invoicing, within the supplier's own country, goods and services that are exempt from VAT under the national legislation – e.g. banking-, insurance services, hospital care, medicine and education.
AAH	Margin Scheme – Title X11, Chapter 4 of Council Directive 2006/112/EC	Special arrangements applicable to second-hand goods, works of art, collectors' items and antiques.	To be used when invoicing second-hand goods, works of arts, collector's items and antiques where the margin scheme is applicable.
AAI	Margin Scheme – Title X11, Chapter 3 of Council Directive 2006/112/EC	Margin scheme for travel agents.	To be used when invoicing for travel arrangements where the margin scheme for travel agents is applicable.
AAJ	Reverse Charge – Article 198 of Council Directive 2006/112/EC	Reverse charge procedure applying to supplies of gold.	To be used when the supplier of the investment gold, which would otherwise be exempt from VAT, has exercised the right to "option to tax", under the Article 26b(C) of directive 77/388/EC. Under this "option to tax" arrangement, the customer is liable to account for VAT on supply, under the reverse charge procedure.
AAK	Reverse Charge Exempt - Article 164 of Council Directive 2006/112/EC	Reverse charge procedure when goods cease to be covered by warehousing arrangements.	To be used when invoicing goods from a non-EC country which have been held in an approved warehouse and should be removed for consumption in an EC country (i.e. not re-exported as in AAB). <u>Example:</u> still using the example above (AAB) as a base the company in country A sells and transfers

			the goods to a company in country B but in this case the company in country B sells and delivers the goods to EC country C for domestic consumption.
AAM	Exempt New Means of Transport – Article 2, 3 and 4 of Council Directive 2006/112/EC	Intra-Community supply of a new means of transport.	To be used when invoicing a supply of new means of transport to a customer in another EC country.
AAN	Exempt Triangulation – Article 141 of Council Directive 2006/112/EC	Triangulation	To be used when invoicing by a company who is the middleman in a triangulation chain i.e. goods trade between three parties in different EC countries and the goods delivered from the first part to the last part.
AAP	VAT exempt/reverse charge, within the construction business, Article 199 1 a-b of Council Directive 2006/112/EC	Reverse charge Supply of certain services within the construction businesses should be taxable by the purchaser instead of the seller.	To be used the services should concern property, building or other establishment. The services mentioned are land- and ground work, construction work, installations, construction finalize work, letting of construction machinery with driver, construction cleaning and letting of labor for these services. The purchaser should be a business which supplies the same services.
AAQ	Reverse Charge – Article 194 of Council Directive 2006/112/EC	Reverse charge procedure. Special scheme, so called domestic reverse charge, for both non VAT registered as well as for VAT registered companies within an EC country in case of domestic supply of goods and services to a VAT registered purchaser in that EC country.	To be used when invoicing goods and certain services, from a supplier (a foreign entity) who is not established and registered or a supplier that is VAT registered for VAT in an EC country, to a customer who is VAT registered in that EC country.
